

Product Bulletin

Bulletin No.: 07152024
Date: July 15, 2024
Subject: ESD2800R25 Launch

We are pleased to announce the launch of the new ESD2800R25 mid-line cabinet water softener. The ESD2800R25 (7397034) is the newest addition to our EcoWater water softening line up providing more value in the mid-line product segment. The ESD2800 has been equipped with an enhanced feature set which includes:

- Salt monitor with low salt indicator
- Flow rate information including average daily gallons used
- Maximum days between regeneration setting
- Regeneration time remaining
- Valve position indicator to assist in servicing

We've also upgraded the valve on the ESD2800R25 to include the 1" single disk valve which provides a higher flow rate and added differentiation from the entry level products.

Product training is available on EcoWater University and can be accessed at <https://ewu-dealer-college.knowledgeanywhere.com/signin>

For cross-reference purposes the ESD2750R25 (7368807) is now replaced by the ESD2800R25 (7397034). The ESD2750R25 (7368807) will be removed from our ordering systems and will no longer be available.

The ESD2800R25 (7397034) is set up and orderable on the dealer portal.
